

Flight Plan 2

Manufacturing, IT & STEM

Goal:

To research and understand various career opportunities within the Manufacturing, Information Technology, and Science, Technology, Engineering & Mathematics Career Clusters.

Description:

This course allows a deep exploration of skills, careers, and postsecondary opportunities within a specific career cluster. Students will investigate and develop individual college & career ready plans.

Objectives:

1. To analyze components of each Career Cluster.
2. To describe career pathways found in each Career Cluster.
3. To explain skills, education and trends related to careers in each Career Cluster.
4. To determine a career plan for a job in the above career clusters.

A Program of Study's Progression
